

Managing Terrorism Risk

AGENDA | Tuesday, March 6, 2018

1:30 P.M. - 1:40 P.M.

WELCOME

1:40 P.M. - 2:10 P.M.

Understanding the Evolving Terrorism Threat Landscape

This presentation will provide an overview of the current global terrorism landscape through analyzing patterns, themes, and trends. It concludes with an assessment of how the global terrorism landscape may look in the future.

2:10 P.M. - 2:40 P.M.

The Evolving Security Landscape Since 9/11

In the nearly two decades since 9/11, the terrorism landscape has evolved considerably, and is on the brink of doing so again. Our security focus is being quickly diverted from counterterrorism and counterinsurgency toward near peer threats, especially from China and Russia. As a result, terrorism has and will increasingly become the province of homeland security, special operations forces and law enforcement. This talk explores the implications of this pivot for both terrorism and domestic security.

2:40 P.M. - 3:10 P.M.

U.S Counter-Terrorism Strategy During the Trump Administration

Learn more about the Trump administration's counter terrorism strategy, including its impact on reducing terrorism risk in the country.

3:10 P.M. - 3:30 P.M.

BREAK

3:30 P.M. - 4:00 P.M.

Lone Wolf Targeting in 2017: A Suicide Terrorist Can Only Die Once

Last year was a very active one for lone wolf terrorism on both sides of the Atlantic. The optimal targeting can be explained by the axiom that a suicide terrorist can only die once. This basic principle of quantitative terrorism risk modeling will be explained using the events of 2017 as examples.

4:00 P.M. - 4:25 P.M.

Terrorism Modeling in 2018: Challenges, Opportunities, and Imperatives

Terrorism blast modeling is a well-established science. The probabilistic side of terrorism modeling, however, is more controversial. Nonetheless, almost \$3 billion of terrorism cover is priced annually – which indicates explicit assumptions about frequency. Learn how underwriters and portfolio managers can confidently lean into a probabilistic view of this global risk.

4:25 P.M. - 4:50 P.M.

Parameterizing the RMS Terrorism Model for 2018

This session will look at upcoming changes of the RMS® Probabilistic Terrorism Model and the impact the changes will have on the insurance industry.

4:50 P.M. - 5:00 P.M.

CLOSING REMARKS

5:00 P.M. - 6:00 P.M.
