

Exposure Manager on the RMS(one)[®] Platform

A New Way to Visualize Your Risk: Get the Insights You Need to Drive Your Business Forward

KEY BENEFITS

- Define damage scenarios at different locales to build comprehensive deterministic models.
- Perform hazard diagnostics by visualizing your risk in the context of RMS HD hazard data layers.
- Report in customizable maps and views, and export results.
- Use the sophisticated querying environment for deep-dive investigation of data trends and making bulk edits.
- Organize and exchange data with colleagues and counterparties.
- Have a powerful querying utility for updates and interrogation of exposure data.

WORK WITH THE EXPERTS

Partner with RMS for access to the best scientists, engineers, actuaries, software architects, and technical experts in the industry. Benefit from our industry expertise and significant collaboration with the academic community.

Minimize Blind Spots

Exposure Manager utilizes the new RMS data model to allow users to capture exposures in both modeled and non-modeled peril regions by leveraging a “big data” platform. Users can quickly and correctly analyze exposure at the portfolio level across geographies and drill down into the drivers of deterministic losses regardless of region.

Respond with Confidence

Using Exposure Manager as a store for exposures means having an up-to-date portfolio view enabled by high-speed analytics for quickly assessing the impact of an ongoing event and responding effectively. With Exposure Manager’s flexible reporting functions and the RMS financial model, users can demonstrate deep understanding of the risk being carried.

A New Way to Visualize Your Risk

With a deeply intuitive user experience designed with the portfolio manager in mind, users can access highly interactive and visually rich analytics. Using performant mapping capabilities, they can visualize the highest resolution of data layers in conjunction with their portfolio of exposures and deterministic losses. They can quickly report at the portfolio level across dimensions, including total insured value, exposed limit, data accuracy, and deterministic losses, and use various visualizations to drill down through the portfolio hierarchy, establishing the drivers of accumulations and portfolio trends.

Best-in-Class Solution

Our portfolio management solution provides advanced exposure analytics in an interactive and drillable user interface, accumulation analytics on hazard and scenario layers, and integrated exchange for sharing files with internal or external parties. These unique capabilities combined with RMS event response services, support from risk management experts, and access to the RMS financial model, make Exposure Manager the best-in-class accumulation management solution.

DEPLOYMENT

Exposure Manager is a cloud-based solution leveraging a global network of data centers. It reflects local standards and practices while providing the highest levels of security, privacy, and data-control.

SECURITY

RMS protects clients' data using enterprise-class security measures built on a security framework that implements best practices from ISO 27001 and the National Institute of Standards and Technology (NIST).

Advanced Exposure Analytics

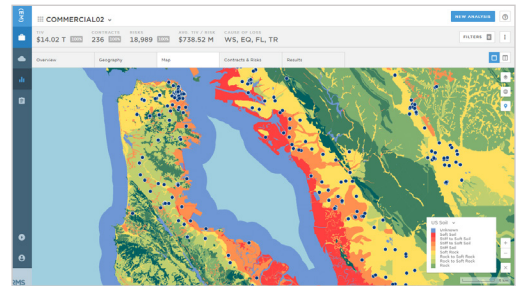

- Deep dive to view and compare raw exposure and accumulation losses in one place.
- Interactive, user friendly, powerful analytics enabled by intuitive best-in-class user experience that can be configured without knowledge of SQL or support from IT.
- Leverage the RMS financial model to provide reliable maximum possible loss metrics.

Highly configurable screen layout in Exposure Manager

Accumulation Analytics Leveraging Hazard Layers

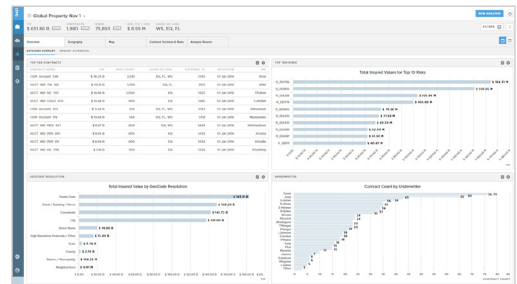

- New dimension to risk management: Users will have rich visualization and accumulations on RMS hazard layers. Exposure Manager supports RMS hazard datasets, which leverage the model IP for a more informed approach to risk management.
- Industry-recognized specialists are on hand to discuss perils affecting your book.

Highly Configurable User Interface

- Customizable cards within Exposure Manager provide completely personalized experiences built on an aggregation of many individual types of content.
- Configure the user interface to display the information needed to gain a deeper understanding of the portfolio you are interrogating.
- Gain more power to discover insights your own way.
